

## INTRODUCTION

EnSight provides a mechanism for users to write their own readers and have the code automatically link and execute at run-time (using a shared library). Since this is a new facility and therefore subject to potential change, usage information is only provided online. See the README files in `$ENSIGHT7_HOME/user_defined_src/readers/` for details. A couple of sample readers, as well as the code for several actual readers are also provided below this directory.
